problems writing precipitation in K2
Posted by jezam - 2010/04/06 09:40

_____

I`m trying to write user-defined precipitation in Kineros, I enter time-depth values, choose saturation index, select watershed and enter filename, but it show me the error below

FormKinerosPrecip.btnWrite_Click()
No se puede encontrar la columna 2

Why is that?, what should i do to make this work?
Thanks
jeanne

_____

ok, i already resolved it by reading another forum.
Thanks anyway
